ENHANCING PULSES PRODUCTION

Technologies & Strategies

The book would serve to sensitize the planners and policy makers as well as the local agricultural development officials to explore and implement region-specific strategy for enhancing pulses production by incorporating these in the prevailing farming systems by harnessing the available technological potential.

Moreover, various technological options and strategies presented in this book would also be useful for all the stakeholders to realize the target of pulses production in near future.

2014, 536pages, figures, tables, colour plates, 25cm
